

TEAM WORK AT WORK...

Perform-A-Deck® VS 300
Architectural Roof Deck System

Project:
The Oratory at Ave Maria University
Ave Maria, Florida

Building / Design Team:
Architects: Cannon Design
Grand Island, New York

Building Contractor: Suffolk / Kraft Construction LLC
A Joint Venture for Ave Maria
Ave Maria, Florida

The vision of a World Class Oratory Building is fast becoming a reality just east of Naples, Florida in the new town of Ave Maria.

Undertaking a project of this magnitude takes a commitment to a **spirit of cooperation** and teamwork from all the Building Team members. From the very beginning of the design stage, the team members at Suffolk / Kraft and Cannon Design have made Martin Fireproofing feel like an integral part of the success of this undertaking. The **Perform-A-Deck VS 300® Architectural Roof Deck System** was selected after careful consideration was given to meeting the building code requirements (particularly the hurricane wind requirements) and the ability to deliver the product in the most efficient manner.

From the early design stages until final installation, Martin Fireproofing Corporation is a teammate you can count on to provide the winning roof deck system time and again.
