WE GOTCHA COVERED with

Perform-A-Deck ASA[®]

ACOUSTICAL ROOF DECK CEILING

The roof deck system was installed on a difficult pie shaped radius such as the commons area depicted in the photograph. It was not a problem for the expert engineering and installation team at **Martin Fireproofing**.

The result was an attractive appearance with a **spacious interior appeal**, **excellent sound absorption**, **structural integrity** and **high insulation values**. The Perform-A-Deck ASA Roof Deck System included a high quality Perform-A-Shield **waterproofing membrane** and a long term warranty all in one turn-key solution.
