Architectural Sheet Metal, Inc. Orlando, Florida

Roof Deck Design and Construct:
Martin Fireproofing Corporation,
Pompano Beach, Florida

Standing Seam Roof:
Series 300® symmetrical seam roof from
IMETCO (www.imetco.com)

As seen here on the Walter Butler Community Center in Cocoa, Florida, the IMETCO / Martin Fireproofing hurricane-enhanced roof and roof deck assembly meets the stringent requirements for resistance to wind speed and pressure, missile impact, and water infiltration.

IMETCO's Series 300® standing seam roof, with its Roman Copper color (one of 28 Kynar 500® and Hylar 5000® protective coatings from IMETCO) beautifully compliments the surrounding area. The foundation for the Series 300 roof is the Perform-A-Deck™ VS 100 roof deck system from Martin Fireproofing.

The complete assembly is backed by a 20-year joint roof and roof deck performance warranty.
